Steve Hatfield/KPA Treasurer  
9811 S 183rd St W  
Clearwater, KS 67026

## Letter from the President

Hello All!

I hope everyone is able to at least log some proficiency time over the winter. As usual our Kansas weather is highly variable so we have to take advantage of any breaks we get. As I write this we have what passes in Kansas as heavy snow coming down. Now, some of us tolerate the cold better than others, such as this guy.

### PICTURE OF THE DAY: ARCTIC PREFLIGHT By General Aviation News Staff - February 16, 2022

*Tom Curran submitted this photo and note: "Prepping my 1953 C-170B for an early winter flight in North Pole, Alaska. Temperature was a balmy -10F, so I shed my parka and mittens to keep from sweating."*

Hope he had one of those Canadian oil-dilution systems on board!  
At our February meeting at Chico's, we discussed upcoming events including Paola fly-out and barbecue lunch on Feb 19. Only 4 of us were able to make it.  
We also mentioned other planned events for this year, Please stay tuned in to our schedule and join your fellow KPA aviators as often as possible!

Blue skies and tailwinds!

Dan DeMott  
KPA President

## Do You Know?

### 1. Your friend asks you what 'angle of incidence' is. You answer:

- A. The Angle between the Cord Line and the Relative Wind.
- B. The Angle between the Cord Line and the Aircraft's Longitudinal Axis.
- C. The Angle between the Cord Line and the Engine Firewall.
- D. The Angle between the Cord Line and the horizontal stabilizer.

**2. You're sitting on the ramp, your altimeter is set to 29.67" Hg, and it reads 1000 feet. You pick up ATIS, and the latest altimeter setting is 30.17. You enter the new setting on your altimeter. What elevation does it read now?**

- A. 0 Feet
- B. 250 Feet
- C. 500 Feet
- D. 1,250 Feet
- E. 1,500 Feet

**3. An engine turbocharger is driven by:**

- A. Gears Connected to the Crankshaft.
- B. Engine Oil.
- C. Exhaust Gas.
- D. A Belt Connected to the Crankshaft.

*Answers are at the bottom of the Newsletter..*

## **Flyout Weatherford Oklahoma**

---

It's that time of year again when Spring is in the air and exciting times are all around. The 19th of March is no exception. We will be Flying to the Thomas P. Stafford Airport (OJA) Weatherford Oklahoma on the historic Route 66. An inspiring museum is located at the airport. The Stafford Air and Space Museum houses over 63,000 square feet of history. OJA is approximately 143 miles Southwest of Wichita.

Upon arriving we will be transported a mere .7 mile to Lucilles Roadhouse a step back into history when the Old Route 66 was a popular road across our nation. The food is good and the staff is friendly. Prices for lunch are moderate with many specialties you would find in a themed restaurant.

After lunch we will return to the museum and visit the exhibits until you are ready to start the journey home. Admission is a mere 11.00 per person with discounts available for seniors, military and those of us that buy fuel while at the airport.

Don't miss this opportunity it has been in the works for 3 years. Tell your friends and other pilots about this venue. You can be assured it will be one of the best trips in the KPA this year. A head count would be appreciated so we can plan transportation and reservations at the restaurant. Please email to [Dan@PCRepairks.com](mailto:Dan@PCRepairks.com), text to 316 990-6064 or just do it the old fashioned way and call me at 316 990-6064. I hope to see you there... In the event of bad weather we will meet at Stearmans Resaurant Benton Kansas.

Please put it on your calendar and plan to be there on March 19, 2022! See you in the Wild Blue Yonder...
